Diving and Snorkelling in Gran Canaria

“

The crystal clear oceanic waters of the Canary Islands are an open invitation to marvel at its spectacular underwater volcanic landscapes, and enjoy its wealth of biodiversity, made up of colourful subtropical species.

The temperatures of the waters in Gran Canaria allow us to enjoy diving all year round in a variety of stunning diving trips, and the island is undoubtedly the perfect spot to learn how to dive with goggles and snorkel, or go scuba diving for the more adventurous.

Gran Canaria is home for world champions. David Barrio and Luis Quintanilla are the 2013 underwater photography world champions.
